- News

EMPLOYMENT HISTORY

- **2018 March - 2019 Sept (geekgarden.id Yogyakarta)**
 - My first experience as a web developer, here I worked using laravel and Vuejs
 - My result here is that I built apps such as ERP, tracker goods for logistics apps, landing pages, calendar booking apps
- **2019 Sept - 2023 Des (frontline-app.com Semarang maintenance remote).**
 - My journey continued in a company that runs in the property sector. Here, I continued to develop web apps for the front office in a hotel; I used laravel in the backend and reactjs in frontend
- **2020 Jan - March (logique.co.id)**
 - At the start of 2020, because I was working remotely on the frontline, I decided to join logique.id, here I am working using old techs like Laravel Five and Zend framework as well
- **2021 Jun - Nov (inovasky.com part-time remote)**
 - Then, my friend asked me to join his startup; I use Golang for the backend
 - Here, I build API services for payment and member management
- **2022 Feb - 2022 Jul (freelance at concatenate.id)**
 - I build web apps to handle the bureaucracy in the company
- **2022 Feb - 2024 Feb (Resync)**
 - Here i working with full-stack role using laravel for backend and nextjs for frontend, I built webapp called sortme.com that runs on financial advisor sector,
